

Project: RENOVATION ON-SITE
Title: ANDRE BEKAI BEAUTY SALON
Date: JULY 2011

Andre Bekai Beauty Salon, located in New Jdeideh, Beirut suburb, is specialized for more than 15 years in hairstyling. This friendly and calm atmosphere offers hair cutting, coloring, make-up, tattoos, and massage. Overall, it is a beauty center for women. This beauty should be reflected in everything inside the salon, which includes the glass. To make the glass more appealing, ClearShield system was chosen.

The ClearShield system was applied on the external surface of the glass. Now that the ClearShield is part of the glass, the glass will maintain pristine appearance, will be easier to clean and keep clean for up to 15 years. This means that frequent

cleaning of the glass is less than before and takes less time to maintain the glass in its original appearance.

In spite of some reconstruction work in the above floors and some rain, the glass is still appealing to the eye compared to an ordinary untreated glass. "I am satisfied", those are the word of the owner, Mr. Andre Bekai.
